I think they're great places to play.
My dad drew the plans for a tree house
And we started to build it one day.
Dad got some boards and a tool box,
He said, "Now we're building. That's good."
He tried not to laugh very loudly
When I nailed my coat to some wood.
Soon my new tree house was ready.
It looked wonderful there on the grass.
Four walls and a door and a carpet
And two windows, both with real glass.

The windows were two different sizes
And the door wasn't perfectly straight.
The walls were a little bit crooked
But Dad thought my tree house was great.

Dad got some rope and a ladder.
He pulled the house into the tree.
My tree house looks crazy and funny

Lost at the parade

It was the sunniest day of the year. Harry and Emily were very excited because they were at the parade with their mom and dad. Harry had a superhero costume with a long, red cape. Emily was dressed up as a pop star.

Harry and Emily loved the parade. They waved at the floats and they looked at all the wonderful costumes and masks. Just then, some dancers and people on stilts came down the street. The dancers moved between Harry and his family. Harry tried to push through the crowd, but the dancers moved too fast. Harry couldn't get away, so he moved down the street with the dancers.

Suddenly, Harry thought he saw a stage. He climbed onto it and looked around for his parents. But then Harry started to move. He wasn't on a stage. He was on a float with a lot of dancers on it. Harry picked up a microphone.

"Hello," he said, and his voice came through all the speakers in the street. "I'm Harry. Mom, Dad, Emily, can you hear me?"

Harry saw his mom and dad running through the crowd. "Where have you been?" they said. "And where's Emily?"

3 Read again and answer the questions.

- 1 Whose idea was the Trojan Horse?
- 2 Why did the Greeks build the Trojan Horse?
- 3 How many Greek soldiers hid in the horse?
- 4 What did the rest of the Greek army do?

Hundreds of years ago, Prince Paris of Troy took a beautiful Greek woman called Helen back to Troy with him. A Greek army sailed to Troy to bring Helen home. For ten long years, the Greeks surrounded the city of Troy. But the city had high, strong walls and heavy gates. No enemy could get inside.

One day, a Greek leader called Odysseus had a clever idea for entering the city. The Greeks listened to his plan and started work immediately. They used large saws to cut down trees and make long pieces of wood. They used hammers and nails to join the wood together to make a huge wooden horse. They put the horse on a large wooden platform with wheels underneath, so that the horse could move along the ground. They made a door in the horse's stomach so that thirty soldiers could hide inside the horse. The rest of the Greeks sailed their ships to an island near the city of Troy and waited.

When the Trojans saw that the Greek camps and the Greek ships were gone, they were surprised but very happy. They came out of the city and the children ran down to the water to swim and play in the ocean for the first time in their lives. The Trojans believed that the Greeks were tired of the war and didn't want to fight any more. Then the Trojans saw the amazing wooden horse.

4 Think! Discuss.

- 1 Do you think the Trojan Horse was a good idea?
- 2 Do you think the Greeks were right or wrong to use a trick to win the war?
- 3 Do you know any other stories about Ancient Greece? What happens in the stories?

At first, they thought it was a wonderful gift. They wanted to take it into the city. But one old man spoke to the crowd. "My friends, I'm sure this is a trap." The old man threw a spear at the horse. The spear stuck in the side of the horse and a strange noise came from the horse. For a moment, the Trojans were afraid and they wanted to burn the wooden horse.

But, just then, some Trojan soldiers arrived with a prisoner. The prisoner was a Greek called Sinon.

"This man can tell us the truth about the horse," said the Trojan soldiers.

"I will tell you the truth," said Sinon. "You are better friends to me than Odysseus. He left me here and now I can't get home!"

The Trojans listened to Sinon and tried to decide whether he was telling the truth or not.

"Tell us the truth about the horse," said the Trojan soldiers.

"The Greeks wanted to end this war a long time ago, and so recently they decided to sail home," said Sinon. "They wanted the gods to send them a good strong wind to blow our ships home. They built this horse and filled it with treasure to make the gods happy."

The Trojans believed Sinon and wanted the treasure that he was describing. They pulled the wooden horse into the city of Troy. The children danced around the horse and musicians began to play. It was time to celebrate the end of the war. The soldiers let Sinon go free, and he went to the beach. He lit a fire to send a signal to the Greek army on their island.

At night, the Greek soldiers quickly climbed out of the horse and down a long rope to the ground. At last, the Greeks were inside the city of Troy. They opened the gates of the city for the rest of their army to enter. Then they found the beautiful Helen and took her home to Greece. This time, the war was truly over.

Glenn and Kathy's eco home is in California, U.S.A. It looks like a house from one of *The Lord of the Rings* movies. Most of the house is underground. The house was very cheap to build. It has wooden beams and wooden floors. The windows and skylights are recycled glass. There are solar panels to make electricity for the lights, CD player, and computer. Glenn and Kathy get water from a well and they grow vegetables in the mud on top of the house.

Glenn was reading a book about underground homes when he decided to build his own amazing home. He wanted somewhere unusual to live and he wanted to use recycled materials to build it. Getting back to nature

Do you want to enjoy an amazing vacation and help to protect the environment at the same time? Why not book a vacation in a Getaway eco cabin in Alaska?

The cabins are beautiful buildings. Builders used wood and mud to build the walls. There are skylights in the roof so we save electricity. The small skylights give us light in the day, so we don't use electric lights. We don't use chemicals to clean the rooms because we don't want to damage the environment.

You can walk in the mountains near the cabin and see lots of local wildlife. Enjoy a boat trip on the lake and see the amazing waterfalls, or visit the beautiful caves. Years ago, people used to live in the caves. You can still see some of the cave homes today.

In the Getaway cabins, you can have a great vacation and enjoy nature. **Come and visit us soon.**

Trash Art

They say that one man's trash is another man's treasure. This is certainly true for HA Schult.

Schult is a German artist and he loves making art from trash. In 1969, he covered a street in Munich with trash to make a huge work of art. In 1983, he used old copies of the New York Times newspaper to create a paper river through part of the city. In the 1990s, Schult used old cans, computer parts, used plastic, and all kinds of other trash to make one thousand life-size sculptures of people. He called the sculptures *Trash People*.

Schult displayed his sculptures at the Amphitheatre of Xanten in Germany. The *Trash People* stood in rows, like an army of soldiers. The exhibition was very popular, so Schult decided to send the *Trash People* on a tour around the world.

Between 1996 and 2008, the *Trash People* visited many countries, including China, Egypt, the U.S.A., and the Antarctic. They stood in front of ancient buildings, and next to world landmarks.

In 2010, Schult used trash to create a whole hotel in Rome, Italy! It's called *Save the Beach*, and it has two storeys and five rooms. Earth Day

What is Earth Day?

Earth Day is an international event when people all over the world think about how we can protect our planet. Earth Day takes place on April 22nd every year.

How did Earth Day start?

In 1970, U.S. politician Gaylord Nelson decided that there should be a special day for people to think about how we can work together to take better care of our planet. The first Earth Day took place on April 22nd, 1970, in the United States. Twenty million people and thousands of local schools and communities took part. Because of the success of the first Earth Day, the government of the United States decided to make new laws to protect the environment. Earth Day soon became an annual event and an international celebration.

Why do we need Earth Day?

Earth Day is important because we all share the same planet. Sometimes, we forget that we are responsible for our planet and that we should protect it for ourselves and for other people. Earth Day is a day for everyone to think about the problems our planet faces, such as climate change, endangered species, deforestation, and pollution. It's a time for us to think about how we can stop these problems and make our world a cleaner, safer place for all the people and animals on Earth.

What do people do on Earth Day?

People celebrate Earth Day in many different ways. Some people hold rallies or demonstrations. They make signs with messages about protecting nature and they march in

3 Read again and answer the questions.

- 1 Who started Earth Day?
- 2 What environmental problems are mentioned in the article?
- 3 How do trees help the environment?
- 4 Why is littering so bad for our planet?

4 **Think!** Discuss.

- 1 Do you think Earth Day is important? Why (not)?
- 2 How do you try to help the environment?
- 3 Do you celebrate Earth Day? Which activities from the article do you want to try?

the streets. Sometimes, they wear costumes to express their message in a funny way. For example, people in a rally for the protection of endangered species might dress up as endangered animals.

Some people plant trees on Earth Day. This is a great activity to do with your family, your friends, or your school. You can buy some young trees and plant them in a park. Trees improve our environment by removing dust, pollutants, and carbon dioxide from the air. Trees also produce oxygen and provide a home for birds, insects, and small animals.

Some schools or families go on a trip to explore nature on Earth Day. Getting out in nature is a great way to learn about your planet, your local environment, and the amazing plants and animals that live there.

Some towns and cities have a Car-Free Day on Earth Day. No cars are allowed to drive around the streets. People walk, ride their bikes, or use public transportation. This is a great way to help the planet because cars produce a lot of dangerous gases and destroy the ozone layer, which protects our planet from the sun's ultraviolet light.

How can we make every day Earth Day?

Earth Day is very important, but we should celebrate and take care of our planet every day. You can help to make every day Earth Day by doing a few simple things.

Don't use cars to get around. Walk or ride your bike to school, to the park, or to the supermarket. Tell your family and friends to walk or ride their bikes, too. It's good for our planet and it's good for your health!

Don't litter. Pick up litter when you see it on the street, on the beach, or in the park. Litter pollutes our planet and puts animals and birds in danger.

Recycle your garbage! Send your garbage to be recycled, or reuse it yourself! Think about ways to use plastic bags, cardboard boxes, glass jars, and old newspapers again. Be creative!

The Earth is your planet. Take care of it!

A day in the life of a firefighter

Rob Elliot has worked as a firefighter for eight years and he loves his job. Rob's day starts at 9 a.m. "Every day is different," says Rob. "On some days, I drive the fire engine. On other days, I wear the breathing apparatus. I enjoy every part of my job."

Rob has rescued people from all kinds of situations. "We get called to road accidents, floods, train and plane crashes, or chemical spills," says Rob.

But firefighters do more than rescue people. They give first aid and they clean up and check sites after an accident or disaster. They often work together with the police and paramedics. They also train people in fire safety.

Today, there was a call. A house was on fire and there were two people trapped in an upstairs bedroom. The firefighters jumped into the fire engines and raced to the house. Rob and another firefighter, Jenny, ran upstairs while the rest of the team used hoses to put out the fire. Rob and Jenny found a mother and daughter in one of the bedrooms. They opened a window and helped the mother and her little girl to climb down a ladder. Soon the fire was out and everyone was safe. "And it's still only eleven o'clock!," said Rob.

The healthy eating pyramid

Healthy eating is about feeling great and having more energy. If you choose the right foods, your healthy diet will be a tasty diet, too.

You can still enjoy your favorite sweet and salty foods, but too much sugar and salt is bad for your body. These foods should only be treats.

Dairy products like milk, cheese, and yogurt are great because they contain calcium and keep our teeth and bones healthy.

Tip: Choose low-fat dairy products.

Meat, fish, eggs, beans, and nuts are important, too. They keep our bodies healthy and they give us energy to work and play.

Tip: Avoid salted or sugary nuts.

Whole grains are an important part of every meal. If you eat lots of whole grains, you will have a healthy heart. Whole grains are in bread, cereal, pasta, and rice.

Tip: Dark bread and brown rice are great sources of whole grains.

Fruit and vegetables are the most important part of a healthy diet. They are low in calories and full of vitamins. Eat lots of fruit and vegetables with every meal, and as snacks during the day.

Tip: Fruit and vegetables with brighter or darker colors have more vitamins.

Pizza problems

If you're a terrible cook, you'll love this story! Last month, my mom bought me a recipe book. I decided to make pizza for dinner one evening.

I mixed flour, salt, and water in a bowl. I was listening to music on the radio. It was very loud, so I didn't hear my brother come into the kitchen. He shouted my name and scared me. I dropped the bowl. The flour and water went all over the table, the floor, and my pants.

Luckily, my family thought my cooking disaster was very funny. We went to a pizza restaurant for dinner. I haven't cooked again since then! If I cook again, I won't listen to music in the kitchen!

Food Journeys

Every living thing needs energy to move and grow. We get this energy from the food we eat. Different living things get their food in different ways.

Producers

Plants are called producers, because they produce their own food. They take energy from the sun and mix it with chemicals from the air and the water in soil to turn it into sugar and oxygen.

Consumers

Animals and humans are called consumers, because we can't make our own food. We need to consume (or eat) other things to get energy. Some consumers eat plants, and some consumers eat other animals. There are three groups of consumers:

-  **Herbivores** – animals that only eat plants.
-  **Carnivores** – animals that only eat other animals.
-  **Omnivores** – animals that eat plants and other animals. Humans are omnivores.

Decomposers

Bacteria and fungi are called decomposers. When plants or animals die, bacteria and fungi eat them and make them part of the soil again. The soil gives energy to new plants.

Food webs show how each living thing gets food, and how different plants and animals are connected. For example, grasshoppers and sheep eat grass. Birds eat grasshoppers. Foxes eat birds and sometimes young sheep. Humans eat sheep. Bacteria eat everything in the food web when it dies.

Just breathe

The movement of your blood through your heart and around your body is called **circulation**. The **process of circulation** is fast! It takes less than a minute to **pump blood to every part of your body**.

- 1 When you breathe in, oxygen goes into your lungs.
- 2 Blood from your lungs fills with oxygen and moves into the left side of your heart.
- 3 The left side of your heart pumps the blood with oxygen in it out through tubes called arteries. Arteries carry blood away from your heart to your body.
- 4 Your body takes the oxygen out of the blood and uses it to stay healthy and strong. We need oxygen for everything we do: moving, growing, speaking, and thinking. If we do not have oxygen, we cannot live.
- 5 When your body uses the oxygen from your blood, it makes carbon dioxide. Your body doesn't need this carbon dioxide, so the blood takes it away. Other tubes, called veins, carry the blood with carbon dioxide in it back to your heart.
- 6 The blood from your body goes into the right side of your heart.
- 7 The right side of your heart pumps this blood into your lungs. Your lungs remove the carbon dioxide from the blood.
- 8 When you breathe out, the carbon dioxide goes back into the air.

3 Read again and write the answers.

- 1 Is circulation slow?

My name is Jim Hawkins. When I was a boy, my father had a small hotel in England, near the ocean. One day, an old sailor arrived at the hotel. He said his name was Billy Bones. He went to the beach every day and looked out at the ocean. Billy had a wooden box in his room. Nobody knew what was inside it.

After a few months, Billy Bones became very ill. When I visited Billy, he pointed at his wooden box. "There is treasure in that box," he said. "If you help me, I will share the treasure with you." But that night, Billy Bones died. I was very sad. I decided to open the wooden box. Inside, I found some papers wrapped in a cloth. I took the papers to Doctor Livesey's house. Doctor Livesey was having dinner with the Squire. They unwrapped the papers and looked at them carefully.

"This is a list of treasure and a map!" said the Squire. "The treasure is on an island. We must get a ship and go to find it." So the Squire found a ship. He also met a ship's cook called Long John Silver who only had one leg. Long John Silver told me wonderful stories about the ocean and about his adventures. I liked talking to him, but I didn't like his pet parrot. It was always shouting.

Soon we were ready to leave. I said goodbye to my parents and we sailed away to look for the treasure. One day, I was tired and hungry. I wanted to rest for a few minutes, but I soon fell asleep. When I woke up, I heard men talking. They didn't see me. One of the men was Long John Silver. "When we find the treasure and get it onto the ship, we'll steal the ship from Jim and his friends," he said. The other men agreed. "We'll leave Jim and his men on the island and we'll all be rich!" they said.

Suddenly, there was a shout. We were near Treasure Island. I found Doctor Livesey and the Squire and I told them about Long John Silver's terrible plan.

3 Read again and answer the questions.

- 1 What did Jim find in Billy Bones's box?
- 2 Who found the treasure?
- 3 Where did Long John Silver run away?
- 4 What does Jim sometimes hear in his dreams?

4 **Think!** Discuss.

- 1 Did you enjoy the story? Why (not)?
- 2 Do you think Jim was brave? Why (not)?
- 3 Do you think Long John Silver is a bad man? Why (not)?

When we arrived at Treasure Island, we all left the ship and went to explore the island. We found a wooden house and we stayed there for the night. When I woke up the next morning my friends were gone! I was very scared. But when the other men left the house, Long John Silver told me his new plan.

"I'm not going to steal the ship or the treasure," he said. "I'm going to help you and your friends. But the other men think I am going to share the treasure with them. We must not tell them our secret."

That afternoon, we went to look for the treasure. But when we found the right place, we saw a large hole in the ground. The treasure was gone! The men were very angry with Long John Silver. "You tricked us!" they said. But then my friends jumped out from behind the trees.

"The treasure is safe," said Doctor Livesey. "We found it last night. We're taking it back to England and Long John Silver is going to come with us. The rest of you must stay here, on Treasure Island."

I was glad to sail away from Treasure Island. We stopped in South America and Long John Silver ran away. He took some of the treasure with him and we never saw him again. When we arrived home, we shared the treasure and lived happily. But sometimes in my dreams I still hear Long John Silver's parrot shouting.

The Heavenly Horse

One and a half thousand years ago, a powerful group of people named the Silla ruled Korea. The Silla had powerful armies to protect their royal families and their land. They built beautiful temples and statues and made wonderful jewelry and decorations.

When Silla kings died, people buried them in great tombs. There are many ancient Silla tombs in Korea, but the most famous tomb is the Cheonmachong tomb in the Gyeongju valley. Only local people knew the tomb was there until 1973, when archeologists decided to study the area. Soon the rest of the world knew about this wonderful place.

The tomb is 47 meters wide and 12.7 meters high. After digging for several months, archeologists found golden jewelry, a sword, a lamp, and some shoes. They also found a gold crown and a gold belt, which shows that the tomb was for a king. Inside a treasure chest, there was a painting of a horse with wings on its feet. Because of this painting, people called the tomb the Heavenly Horse.

Today, the Heavenly Horse tomb is a very popular tourist attraction. Visitors can go inside the tomb and see where the king lay for hundreds of years. If you travel to Korea you should definitely take the chance to see this amazing place.

A visit to the Colosseum by Ben Sanders

Have you ever wondered what life was like in ancient Rome? A visit to the Colosseum is a wonderful way to find out something about life in Roman times.

I visited the Colosseum on a cold morning last February. I could smell fresh bread from the bakeries as I walked through the noisy streets. Suddenly, I saw the Colosseum in front of me.

Sadly, the Colosseum is in ruins now. But I imagined excited Romans sitting in the seats and watching a great show. I explored the rooms under the Colosseum where the Romans kept things for the shows. I felt scared, because the rooms were small and dark.

As I was leaving, I saw a man wearing a Roman costume. "Come back soon," he said. I hope I will visit the Colosseum again soon. It's an amazing place.

Alexander and the Terrible, Horrible, No Good, Very Bad Day

Alexander and the Terrible, Horrible, No Good, Very Bad Day is a great movie. It's a comedy and it's directed by Miguel Arteta. The movie is based on a children's book by Judith Viorst. The main character in the movie is an eleven-year-old boy called Alexander Cooper. Alexander is played by Ed Oxenbould. He's only a teenager, but he's already been in lots of movies.

In this movie Alexander has the worst day in his life. Alexander lives in the U.S.A. with his mom, dad, older brother, older sister, and baby brother. His terrible day starts when he gets gum stuck in his hair, and then lots more things go wrong, one after the other. Alexander tells his family about the horrible things that happened to him, but his family doesn't feel sorry for him at all. Alexander's family members are all very confident and cheerful, and they can't see the problem. Alexander starts to think that bad things only happen to him. He wishes that his family could understand how he feels. But then Alexander's wish comes true, and his brothers,

sister, mom, and dad all have terrible days, too. Now they know just how Alexander feels! The family faces accidents, disasters, and even some wild creatures, like a crocodile and a kangaroo! Luckily, the terrible day teaches the family to stick together and help each other. They all agree that they need to have a few bad days so that they can really enjoy their good days.

TIME FRAGMENTS

The Palermo Stone is part of a large stone tablet from Ancient Egypt. The tablet contained a list of the pharaohs of Egypt and told about important events in Egyptian history. The tablet is the oldest historical text from Ancient Egypt. It was made more than 5,000 years ago. Today, the Palermo Stone is in a museum in Palermo, Italy.

◀ Greek pots are important because they tell us what life was like in ancient Greece. The ancient Greeks often decorated their pots with scenes from everyday life. Sometimes these scenes show what the pot was used for, and sometimes they show events that happened in Greek life or Greek mythology.

The San Bartolo murals are inside a pyramid in Guatemala. They are the oldest Mayan murals in the world, and they were discovered in 2001. The murals were painted by excellent artists, and they tell the story of how the universe was created. They also tell us a lot about Mayan life.

The Bayeux Tapestry isn't really a tapestry. It's an embroidered cloth and it tells the story of the Battle of Hastings in 1066. The Battle of Hastings is the most famous battle in England's history, and the Bayeux Tapestry is the longest piece of embroidery in the world. It's about as long as three swimming pools!

Famous people in the news by Tom Adams

Celebrities are always in our newspapers and magazines. They are not always happy when stories about them are reported in the news. But I believe that the public should know about famous people's lives.

First, celebrities want to be famous. It seems to me that celebrities should be pleased when their photo is printed in newspapers or magazines, because it means that people are reading about them.

Also, people spend a lot of money on tickets to watch concerts, movies, and sports events, so they want to know about the celebrities' lives and personalities.

On the other hand, reporters and photographers sometimes make life difficult for famous people. They wait outside celebrities' houses and they often follow them. In my opinion, this is a problem.

In conclusion, I think reporters should write about celebrities, but they shouldn't make life difficult for famous people. After all, celebrities are people, too.

How China changed the world

China has a rich and fascinating history. From ancient times, Chinese engineers and inventors have made amazing inventions and discoveries. The Ancient Chinese often invented or knew about things long before the rest of the world, but eventually their ideas reached other countries and changed the world. Many of the things that we use today originally came from Ancient China. These are some of China's most important inventions:

Paper

The Chinese invented paper in the 2nd century BC. That's over two thousand years ago! Three hundred years later, in 105 AD, the Chinese invented a way to manufacture paper, so they could make lots of paper to write on. At this time, people in the rest of the world were writing on clay or animal skins. The Chinese used their paper to make paper money and playing cards.

Printing

Hundreds of years before Gutenberg invented his printing press in Europe, the Chinese invented a printing press and printed newspapers and books. The first printed newspapers were sold in Beijing in 700 AD, and the first printed book with pictures was printed in China in 868 AD. In 1155 AD, the first printed map

was produced in China. Thanks to these inventions, books changed the world by improving education and making information available to everyone.

The Compass

When the Chinese invented the compass between the 2nd century BC and the 1st century AD, they used it to choose the best places to build their homes. The Ancient Chinese believed that their homes should face north, so they used the compass to find the correct direction. Later, the compass was used for traveling on land and sea. The compass made some of history's most famous journeys possible.

Silk

The Ancient Chinese were the first people to make silk. Silk thread is made by silkworms. The Chinese collected the thread and used it to make a soft, light material. Wealthy people in Europe wanted silk to make their clothes, so a lot of people bought silk from the Chinese. The route from Europe to China was called the Silk Road. For hundreds of years, the Chinese didn't tell anyone how to make silk. It was a wonderful secret.

The Kite

There are many stories about how the kite was invented. Some people believe that a Chinese farmer tied a string to his hat to stop it from blowing away, and his hat became the first kite. Other stories say that Chinese soldiers used kites to send

messages to each other or to warn each other when danger was coming. The first written report of someone using a kite is from about 200 BC, when Chinese army leader Han Hsin flew a kite over the wall around a city to measure how far his army needed to dig underground to make a tunnel into the city! One thing is certain: the kite gave inventors the idea for the plane, so it was a very important invention in the world's history.

Fireworks

Fireworks may not seem like an invention that changed the world. However, the main ingredient in fireworks is gunpowder, and gunpowder certainly changed the world.

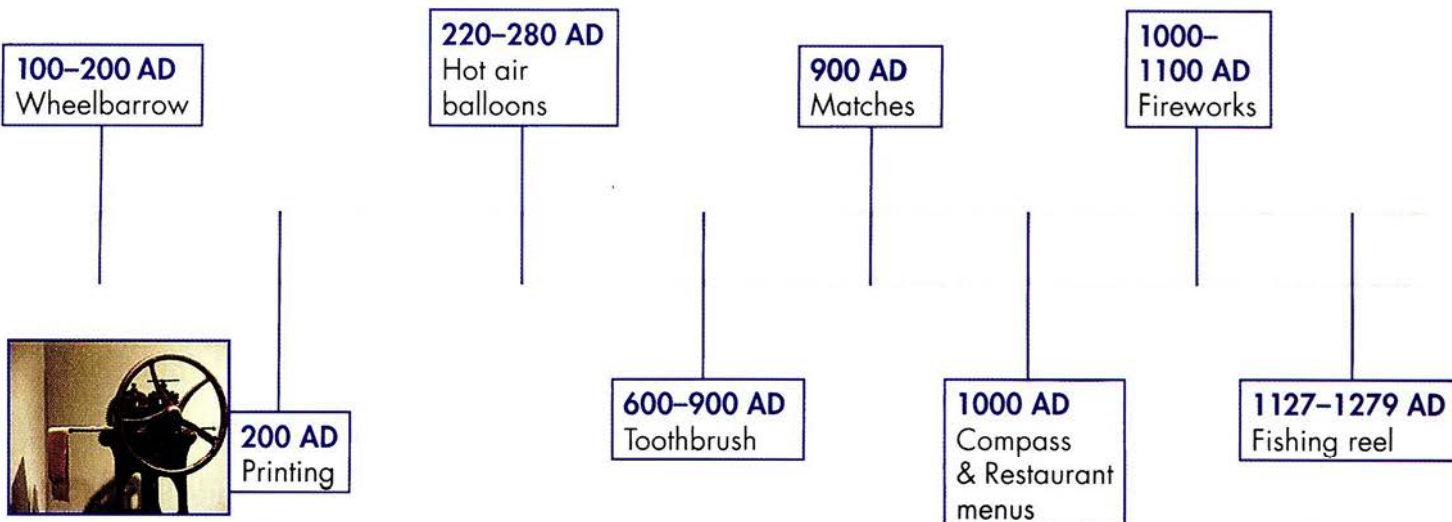

The first fireworks were invented by the Ancient Chinese. The invention might have been an accident, but firework displays soon became very popular. Until

the 12th century, the Chinese only used gunpowder for entertainment. But in 1161, they used explosives to make weapons for the first time. Cannons and guns were also invented by the Chinese. At first, exploding weapons gave the Chinese a great power. They were able to protect themselves from their enemies. But people began to buy gunpowder and guns and take them back to Europe. Soon everyone had these powerful weapons and the world changed forever.

Pasta

When we think of spaghetti, we think of Italy. But in fact the Chinese invented pasta and made it into long, thin strips called noodles. The Chinese were eating pasta for four thousand years before European explorers took the idea back to Europe.

Ancient Chinese inventions are part of our everyday lives, whether we realize it or not. When you use an umbrella, you are using a Chinese invention. The Chinese made the first umbrellas to protect themselves from the sun and rain. When you use a match to light a fire, you are using another great idea from Ancient China. The Ancient Chinese invented wheelbarrows, bells, hot air balloons, forks, toothbrushes, soccer, dominoes, fishing reels, and restaurant menus. Can you imagine a world without any of these things?
