- 3 Bjorn _____ (like) winter best. He _____ (like) spring.

Seasons round the world

Donna from Australia

I like summer best. We cook and eat in the garden, and we often go to the beach. I don't like sunbathing, but I love water sports. I go surfing and waterskiing, and I sometimes go sailing with my dad. Summer here is from December to February, so we always spend Christmas Day on the beach. My cousins in England think this is very funny. They think it's always warm and sunny here in Australia, but in July and August it's sometimes cold and wet.

Bjorn from Norway

Here's a joke about my country: 'Winter is nine months long, and the other three months are good for skiing.' It isn't true! Yes, the winter months are December to February, but it is often cold in spring and autumn, too. And summer is a short season for us, but it is warm, with very long days. Spring is my favourite season. It's the best time to go skiing. I love skiing down a snowy mountain very fast, under a beautiful blue sky. Sometimes you can still ski in June - isn't that amazing?!

Aroon from Thailand

I live in Chiang Mai in the north. We don't have four seasons here, we have three - hot, rainy, and cool. I like the cool season from November to February. It's our 'winter', and it's cold at night, but it's quite hot in the daytime. In February, we have lots of beautiful tropical flowers - red, orange, and pink, so every year we have a wonderful flower festival. I go with my friends and we sing and dance - I love it!

The White House, 1600 Pennsylvania Avenue, Washington DC, is the most famous address in America. It is where the President works, but it is also his private home, where he lives with his family. He has children's birthday parties, holiday dinners, and family weddings in this world-famous building.

THE BUILDING

First built in 1800, the White House is where the President of the United States governs a country of 50 states and 324 million people.

He lives with his family on the second and third floors. There are 16 bedrooms, a living room, a kitchen, and a dining room. Special guests stay in the Queen's Bedroom or the Lincoln Bedroom.

In the West Wing are the staff offices. The President's own office, the Oval Office, is also there.

It has three large windows behind the President's desk, and there is a fireplace at the other end.

Each new president chooses new curtains, new furniture, and a new carpet. There are pictures of old presidents on the walls, and there is a famous desk, a gift from the British Queen Victoria.

THE WHITE HOUSE DAY BY DAY

About 150 people work for the President in the West Wing and for the First Lady in the East Wing. Another 100 people look after the building day and night. The White House is open to visitors. It is free. About 6,000 people a day visit.

There are 132 rooms, 35 bathrooms, and five kitchens, all on six floors. There are three elevators*. The State Dining Room is big enough for 140 guests.

Outside, there are gardens with not only flowers, but also fruit and vegetables. There is also a tennis court, a running track, and a swimming pool. Inside, there is a movie theatre*, a billiard room, a bowling alley, and a library. As former President Ronald Reagan said, 'The White House is like an 8-star hotel!'

Galileo Galilei
– the father of modern
science 1564–1642

Galileo Galilei was an Italian physicist, mathematician, astronomer, and philosopher. He was a brilliant scientist, and is often called 'the father of modern science'.

PERSONAL LIFE

Galileo was born in Pisa, Italy. He was the first of six children of Vincenzo Galilei and Giulia Ammannati. His father was a famous musician.

Galileo's early education was in a monastery. Later, at the University of Pisa, he was first a student of medicine, and then a student of mathematics. From 1592 to 1610 he was a professor of mathematics and astronomy at the University of Padua.

Galileo was the father of three children – two daughters and a son – but he wasn't married to their mother.

SCIENTIFIC LIFE

Galileo could make excellent telescopes, and with them he could see moons going round the planet Jupiter, and the planet Venus going round the sun.

At the time, the belief was that the Earth was the centre of our universe, and that the sun went round the Earth. Galileo's theory was that the sun was the centre, and the Earth moved round it.

THE LAST YEARS

The Roman Catholic Church wasn't happy with Galileo's ideas. They were dangerous, because they were different from the ideas in the Bible.

In the last years of his life, Galileo was completely blind, and couldn't see anything. He died in his home in Florence in 1642. He was 77 years old.

JOHN LENNON 1940–1980

John Lennon was a member of a band called The Beatles. With Paul McCartney, he wrote some of the greatest songs of the 20th century.

John Lennon had an unhappy childhood. His father left home when he was five. His mother couldn't bring him up, so John lived with his aunt

Mimi until he was 19. When he was 17, his mother died in a car crash. He went to Quarry Bank High School in Liverpool. He met George Harrison and Paul McCartney, and in 1960 they started a band called The Beatles.

The Beatles recorded their first single *Love Me Do* in 1962. They became famous in 1963, when they played more than 200 concerts. In 1964, they went to the United States for the first time and played on American television.

No more concerts

The Beatles stopped playing live concerts in 1966 because the audience made so much noise that nobody could hear the music. They continued to record songs, and in 1967 they made the album *Sgt. Pepper's Lonely Hearts Club Band*. The last album they recorded together was *Abbey Road*.

John Lennon married the artist, Yoko Ono, in 1969, and in 1970 The Beatles broke up. John and Yoko moved to New York. John wrote and sang his most famous song *Imagine* in 1971. In 1980, he and Yoko recorded a new album, *Double Fantasy*.

He was killed a month later. An American, Mark Chapman, shot him outside John's New York apartment near Central Park. Two days before his murder, John Lennon told an interviewer, 'I feel safe in New York. I can go anywhere. It's my home.'

A History of the Early Cinema

1895-1940s

The first moving picture shows started in theatres in England, France, and the United States at the end of the 19th century.

1895-1910 Silent movies

In 1905, the first cinema, or 'Nickelodeon', opened in Pittsburgh, and by 1907 there were about 4,000 'Nickelodeons' in the US. The films were short (sometimes just one minute long) and silent, but there was usually a pianist to accompany them. Film shows lasted about half an hour.

Later films became longer and were often Bible stories. Until 1910, the actors were not named. With the longer films, their names started to appear on screen. The idea of 'film stars' was born.

1910-1927 'HOLLYWOOD' is born!

In the early years, American films were made in or near New York, but in 1910 many film companies moved to California because of the sunshine and the scenery. Westerns – films about cowboys – became very popular, and California was the perfect place to film.

By 1914 American films were very popular, and Hollywood became a 'movie factory'. In the 1920s studios made about 800 films a year, 82% of the world's films. Hollywood's silent movie stars, such as Charlie Chaplin and Buster Keaton, became famous throughout the world.

1927-1940s The coming of SOUND!

Hollywood made its first movie with sound in 1927. It was called *The Jazz Singer*. By the end of 1929 nearly all films were 'talkies'. Now began what is often called 'The Golden Age of Hollywood', with its rich, famous, glamorous film stars such as Clark Gable, Greta Garbo, Humphrey Bogart, and Judy Garland.
